

SINERIUM™

The image shows a close-up of a building's facade with the Sinerium logo and name. The logo is a stylized diamond shape with a 'S' inside, and the word 'SINERIUM' is written in a bold, sans-serif font to its right. The background is a dark, blue-tinted sky with some clouds.

SINERIUM PURPOSES

Tokenization

Sinerium offers cryptocurrency and digital solutions to companies and individuals. It provides tokens, NFT and similar cryptological products to companies that continue their commercial activities, allowing companies to develop their fields of activity. This process is managed by a professional team.

New Future

There are great ideas in the world waiting to be funded. Prudential ideas are brought to life with Sinerium. Through Sinerium New Future, we enable everyone to freely share their ideas and bring them to life. Ideas that can be developed as a Sinerium community are shared in a free and transparent environment. Essential conditions are provided to realize the idea and project it.

HOW IT WORKS?

Thanks to Sinerium New Future, which is compatible with trends, advanced and sustainable, web and mobile compatible, users can submit their projects ideas they want to actualized and prototypes they have actualized to the votes of investors. The ideas with the most votes gains Sinerium as a prize. Thanks to Sinerium New Future, Sinerium offers an excellent investment opportunity for the new future. With Sinerium New Future, both the investor and the idea owner begin a Start-Up together for the new future. That's why the future is in Sinerium New Future!

Start-Up Ideas

Everyone can easily share their ideas on the Sinerium platform and these ideas are published in Sinerium New Future after a required review. By this way, ideas are collected. A rating is made among the collected ideas. People with ideas can ask for votes to be ranked. After publishing the idea, the owner of the idea can also share a link and ask for votes. Necessary promotional activities in all media platforms will be made by directing them to Sinerium New Future. This will start the race. When the voting is over, the winners will be provided with the necessary funding support to shape the future through Sinerium.

Support can be provided to popular projects and ideas outside the competition. People outside the competition will be able to support their favorite ideas with Sinerium Token. Users will be able to send Sinerium Tokens to the ideas they want through the Sinerium Platform. Each Sinerium Token sent will earn you a raffle ticket. This raffle ticket you obtain will entitle you to participate in the monthly prize draws held at Sinerium New Future. In this way, while investors have the opportunity to shape the future, they can also win great prizes by participating in the lottery. Investors will also make big income as ideas find support and come to life.

SINERUM™

. Sinerium Projects

Sinerium Exchange: When Sinerium provides tokens to a sufficient number of companies, it will create and launch its own Exchange platform.

Sinerium Wallet: Sinerium will create a cryptographic wallet that can be integrated into their projects.

Sinerium Akademik: By establishing an online education substructure, it will create a cryptologic education platform where people can share their studies and education.

Sinerium Sosyal Medya: Sinerium develops innovative and exclusive social media that will provide the basic needs of the crypto money industry and include the Sinerium Tokens.

[Start-Up – Blockchain – Community]

Sinerium Blokchain Start-Up Centers

By compound the Start-Up sector and the crypto money sector, Blockchain Start-Up Centers special to the crypto money community are established in countries that support the Sinerium Community. In these centers, new Start-Up ideas will come to life and work will be carried out with people who want to bring innovative ideas to life around the world. In this way, a working environment will be created for solutions that will take the world forward.

Sinerium will be a crypto asset that will help these initiatives come to life by supporting innovative initiatives that will emerge from Blockchain Start-Up Centers. Sinerium aims to prevent, as much as possible, the extinction of great ideas waiting to grow in the world.

MARKET PROBLEM & SOLUTIONS

Sinerium was created to produce direct solutions to 2 different basic problems. The first problem is the want of companies to create additional financial resources and the production of innovative technological solutions. The second problem is that Start-up companies cannot produce sufficient financial resources and therefore good ideas cannot come to life or these processes take too long.

Anonymous, LTD ve Product for Legal People, Generate Fund and Resource

It is a necessity for every company to create additional financial resources for companies that continue their commercial activities. For this purpose, we offer innovative solutions such as cryptocurrency products, tokens and NFT to successful companies that continue their commercial activities. Sinerium tokens will be a digital asset that we will use to solve this problem. As the Sinerium developer team, we negotiate with the companies, we will enable companies to produce new projects or create new financial resources for their ongoing projects by producing innovative ideas so that they do not remain unfamiliar with the crypto money industry.

Direct Funding and Solution Application for the Start-Up Industry

Many innovative ideas disappear before they can be actualized. The biggest reason why these ideas did not come to life is the inability to create financial resources for the projects and the lack of support for these ideas. We, as Sinerium, will create additional financial resources for Start-up companies or ideas that can develop independently of companies, together with the new technologies we are working on, and enable these ideas to be projected and implemented.

With the application we developed, Start-up companies and projects at the idea stage will be exhibited within our application. People who want to support these projects and ideas on display will be able to fund these projects as well as win awards from the Sinerium token pool in the applications. In this way, important projects within the Sinerium platform will be actualized.

Sinerium is a token created to support innovation projects and innovative ideas waiting to come to life. In this way, it will enable useful and open-ended ideas to come to life in the world. Sinerium acts as a bridge connecting the crypto money industry with the Start-up and finance industry.

Sinerium Start-Up Blockchain Centers

One of our goals is to establish Sinerium Start-Up Blockchain Centers for the implementation of important innovation projects that are at the idea stage. In these centers, people will be able to access all the facilities that will enable their ideas to be realized. These centers will become the Digital Silicon Valley of cryptocurrency markets like America's Silicon Valley.

SINERIU TOKENOMICS

Tokenomics

Total Supply	99,000,000 XNR
Total Stake Reward	58,000,000 XNR
Wallet Stake Reward	3,000,000 XNR
Sinerium Affiliate Award Program	5,000,000 XNR
Sinerium Developer Team	2,000,000 XNR
Sinerium R&D Studios	2,000,000 XNR
Sinerium Burning Pools	29,000,000 XNR

Sinerium Remaining after Burning 70,000,000 XNR

SINERIUUM™

Sinerium Stake System

A total of 29,000,000 Sinerium Tokens can be staked. Stakes will be made by sending them to burning pools in wallets. 29,000,000 coins will be staked and in return, a total of 58,000,000 reward Sinerium Tokens will be distributed to the wallets that have staked for 16 months. The 29,000,000 staked tokens will burn after 16 months, and users will reduce the total supply by staking and generating coins.

By staking, profit is made and the amount in the stake is sent to the burning pool. In this way, while earning Sinerium Tokens from the award program for 16 months, the first staked Sinerium Tokens are burned in the burning wallet and removed from circulation.

Wallet Stake Award

Sinerium Wallet: By staking Sinerium Token in your secure digital wallet, you are entitled to a share of the daily rewards program. 500 Sinerium Tokens are distributed daily in the reward program for the first 6 months. For the next 6 months, 1000 Sinerium Tokens are distributed daily in the reward program. For the next 6 months, 1500 Sinerium Tokens are distributed daily in the reward program. The bounty program will end after a total of 3 million tokens have been distributed. Sinerium Tokens staked to the Wallet can be unlocked and reclaimed after the end of the stake.

Affiliate Award Program

A total of 5 million tokens are reserved for the Affiliate Rewards Program. 5 Million tokens will be distributed to wallets that meet the Affiliate Rewards Program requirements.

Reward Program: 10% Affiliate Reward Program is available. The developer team has allocated 2,000,000 Sinerium Tokens for the ideas of the projects and the development of their projects.

R&D

For the sustainability of the project, 2,000,000 Sinerium Tokens were allocated for R&D studies.

Burning Pool

Sinerium Token must be burned in order to benefit from the Sinerium Token Stake Reward Program. There will be 29,000,000 Sinerium Tokens in the total stake burning pool.

Total Remainder

After the amount of tokens that will be released in all reward programs, the remaining amount of Sinerium Tokens will be 70,000,000 pieces and will not be higher. However, the Sinerium Foundation and its developers will burn Sinerium Tokens from the market at certain times each year for coin development and support.

Automatic Burning

In the coming days, the automatic burning function on our contract will be activated. For each transfer, 0.3% will automatically go to the burn wallet and disappear. In this way, as the total supply decreases, the value of Sinerium Tokens in the market will increase constantly.

SINERIUM ROADMAP

2021 4.Quarter

- Token Beginning
- Start of stake rewards program
- Enter to exchange market

2022 1.Semi

- Strategic partnerships with companies and starting to produce cryptological products
- Start-Up Support Platform Alpha Edition
- Sinerium Wallet Beta Version

2022 2.Semi

- Getting Start-Up projects to be funded
- Strategic partnerships with companies with tokenization work
- Sinerium Token new strategic partnership agreements
- Token burning with the Sinerium Foundation

2023 1.Semi

- Sinerium Exchange platform Alpha Edition
- Special solutions for companies
- Development of tokens
- Development of supported start-up projects with the beta version of the Start-Up Support Platform

2023 2.Semi

- Arrangement of ongoing projects and new token and product deals
- At least 1 Start-Up project reaches the level where it can exit
- Sinerium Wallet full version
- Sinerium Token burning with the support of the Sinerium Foundation and the companies we collaborate with

2024 1.Semi

- Supporting innovative Start-Up ideas
- Clarification of location determination and interview studies for Start Up Blockchain Centers.
- Full version of Start-Up Support Platform
- Announcement of new partnerships

2024 2.Semi

- Development of secure crypto asset wallet Sinerium Wallet
- Support for innovative ideas and new Start-Ups that will answer the needs of the period.

2025 2.Semi

- Initiation of Sinerium Blockchain studies
- Initiation of installation preparation works for Sinerium R&D Centers
- New technological products that Sinerium Wallet will work with integrated
- Sinerium Token burning with the support of the Sinerium Foundation and the companies we collaborate with

2026 1.Semi

- Completion of the Sinerium Start Up Blockchain Center
- Starting its own substructure work with the Sinerium Blockchain.
- Supporting new ideas and projects with Sinerium R&D centers
- Sinerium Start-Up platform full version.
- Solution partnerships and tokenization studies with new companies

2026 2.Semi

- At least 5 Blockchains in Sinerium Start-Up Blockchain Centers
- Beginning of Start-Up idea activities
- At least 15 projects on the Sinerium Start-Up Platform have an active role in the market so far.
- Solution partnerships with new companies
- Tokenization studies
- Sinerium Token burning with the support of the Sinerium Foundation and the companies we collaborate with

2027 2.Semi

- Publishing new projects with Sinerium wallet integrated
- Solution partnerships with new companies
- Tokenization studies
- Sinerium Token burning with the support of the Sinerium Foundation and the companies we collaborate with
- Determining the new roadmap with the Sinerium Foundation session

2027 1.Semi

- Working environment with Sinerium Foundation and Community with innovative ideas suitable for the conditions of the period.
- Identifying new locations for Sinerium Start-Up Blockchain Centers
- Solution partnerships and tokenization studies with new companies
